

About us

This website's content lies within the responsibility of the "Statistic Platform Lake Constance". The Statistic Platform Lake Constance is a working group of the Economic Commission of the "[Internationale Bodenseekonferenz](#)" (IBK) – a network of German and Austrian federal states, Swiss cantons and the Principality of Liechtenstein, all located in the Lake Constance area.

The Platform's mission is to offer publicly available statistical figures on various themes, covering this cross-border area. It emerged from a similarly named Interreg IV project, managed by the translake GmbH. In this project, experts in public statistics from all IBK member states and cantons established a statistic platform for the cross-border area of Lake Constance.

The working group is managed by the [Bureau for Statistics of the Canton of St.Gallen](#).

Following institutions are also participating in the working group:
